

Project Manager (m/f/d)

VPM is a development consulting firm for the biopharmaceutical industry. Unique about us is that VPM began as a project management organisation, successfully developing and out-licensing three out of five proprietary products sourced from academic laboratories. VPM now offers consulting and services for the entire product development value chain.

We live product development - transforming ground-breaking ideas into life-saving medication.

We belong to Serum Institute of India Pvt. Ltd., the world's largest vaccine manufacturer. Together, we bring lifesaving medication to the market. Two out of three children worldwide are vaccinated at least once with a vaccine from Serum Institute.

To support our team of Project Managers responsible for company and client projects we are looking for a

PROJECT MANAGER

to join our team at the earliest opportunity (full time employment).

Are you looking for new challenges? Do you like structural and analytical thinking and planning? Do you want to take responsibility within a project? VPM is offering you the chance to achieve all of this in an ambitious company. Become part of our team!

Job Profile:
